

## 3D PINES & CONIFERS

The partnership Abvent / Bionatics offers to Artlantis customers the most realistic plant library based on the real and natural genetic elements of the plants. Leaf, bark, flowers, fruits everything is simulated.

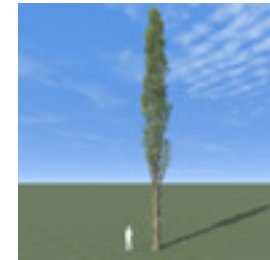

This DVD provide 24 photo-realistic 3D Models of trees (several ages) , delivered in low definition (< 2.000 polygons) for distant sight and in high definition (>150.000 polygons) for large plan . Simply drag and drop these objects in the scene.

These objects are created from Bionatics seeds.
